LIST OF CONTENTS

VOLUME 43

NUMBERS 1–2

Y. H. Lee, M. Gen and **D. S. Hochbaum**	1	A focused issue on supply chain management
C. K. Y. Lin, C. K. Chow and **A. Chen**	5	A location-routing-loading problem for bill delivery services
S. M. Disney and **D. R. Towill**	27	A procedure for the optimization of the dynamic response of a Vendor Managed Inventory system
S.-G. Koh, H. Hwang, K.-I. Sohn and **C.-S. Ko**	59	An optimal ordering and recovery policy for reusable items
C. Sung, Y. Seo, J. Hahm and **S. Kang**	75	Coordination of investment decisions on marketing and logistics for the optimal supply chain operations
A. S. Sohal, D. J. Power and **M. Terziovski**	97	Supply chain management in Australian manufacturing—two case studies
D. Han, I.-W. G. Kwon, M. Bae and **H. Sung**	111	Supply chain integration in developing countries for foreign retailers in Korea: Wal-Mart experience
W. Choi and **Y. Lee**	123	A dynamic part-feeding system for an automotive assembly line
M. M. Naim, P. Childerhouse, S. M. Disney and **D. R. Towill**	135	A supply chain diagnostic methodology: determining the vector of change
Y. J. Yoo and **J. T. Rhee**	159	An application of SCM-based logistics planning in the trade between South and North Korea
Y. H. Lee and **S. H. Kim**	169	Production–distribution planning in supply chain considering capacity constraints
B. Jeong, S.-B. Sim, H.-S. Jeong and **S.-W. Kim**	191	An available-to-promise system for TFT LCD manufacturing in supply chain

PII: S0360-8352(02)00206-1

Y.-S. Yun and **M. Gen** — **213** Advanced scheduling problem using constraint programming techniques in SCM environment

H. Min and **G. Zhou** — **231** Supply chain modeling: past, present and future

G. Zhou, H. Min and **M. Gen** — **251** The balanced allocation of customers to multiple distribution centers in the supply chain network: a genetic algorithm approach

Y.-J. Jang, S.-Y. Jang, B.-M. Chang and **J. Park** — **263** A combined model of network design and production/distribution planning for a supply network

H.-S. Hwang — **283** Design of supply-chain logistics system considering service level

A. Syarif, Y. Yun and **M. Gen** — **299** Study on multi-stage logistic chain network: a spanning tree-based genetic algorithm approach

S. H. Song, K. S. Lee and **G. S. Kim** — **315** A practical approach to solving a newspaper logistics problem using a digital map

C. Moon, J. Kim and **S. Hur** — **331** Integrated process planning and scheduling with minimizing total tardiness in multi-plants supply chain

Y. H. Lee, C. S. Jeong and **C. Moon** — **351** Advanced planning and scheduling with outsourcing in manufacturing supply chain

Y. H. Lee, M. K. Cho, S. J. Kim and **Y. B. Kim** — **375** Supply chain simulation with discrete-continuous combined modeling

S. C. H. Leung, Y. Wu and **K. K. Lai** — **393** An optimization model for a cross-border logistics problem: a case in Hong Kong

NUMBER 3

F. E. Vergara, M. Khouja and **Z. Michalewicz** — **407** An evolutionary algorithm for optimizing material flow in supply chains

Y. M. Dessouky and **A. Bayer** — **423** A simulation and design of experiments modeling approach to minimize building maintenance costs

M.-C. Chen and **S.-K. S. Fan** — **437** Tolerance evaluation of minimum zone straightness using non-linear programming techniques: a spreadsheet approach

S. S. Makhanov, D. Batanov, E. Bohez, K. Sonthipaumpoon, W. Anotaipaiboon and **M. Tabucanon** — **455** On the tool-path optimization of a milling robot

Abu M. Huda and **Christopher A. Chung** **473** Simulation modeling and analysis issues for high-speed combined continuous and discrete food industry manufacturing processes

Ashraf Shikdar, Saeed Al-Araimi and **Bill Omurtag** **485** Development of a software package for ergonomic assessment of manufacturing industry

S. G. Koh, B. S. Kim and **B. N. Kim** **495** Travel time model for the warehousing system with a tower crane S/R machine

R. Bryan Kethley and **Bahram Alidaee** **509** Single machine scheduling to minimize total weighted late work: a comparison of scheduling rules and search algorithms

Chin-Yin Huang and **Shimon Y. Nof** **529** Evaluation of agent-based manufacturing systems based on a parallel simulator

Alfred J. D. Lambert **553** Determining optimum disassembly sequences in electronic equipment

Young-Chang Hou and **Ying-Hua Chang** **577** The new efficient hierarchy combination encoding method of evolution strategies for production allocation problems

Chi-Sheng Tsai **591** Evaluation and optimisation of integrated manufacturing system operations using Taguch's experiment design in computer simulation

Chiung Moon, Moonhwan Lee, Yoonho Seo and **Young Hae Lee** **605** Integrated machine tool selection and operation sequencing with capacity and precedence constraints using genetic algorithm

Young Su Yun **623** Genetic algorithm with fuzzy logic controller for preemptive and non-preemptive job-shop scheduling problems

Hajaj A. Al-Oraini and **M. A. Rahim** **645** Economic statistical design of $\bar{X}$ control charts for systems with Gamma (λ,2) in-control times

A. Khan and **A. J. Day** **655** Erratum to "A Knowledge Based Design Methodology for manufacturing assembly lines" [Computers & Industrial Engineering 41(4) (2001) 441–467]

NUMBER 4

Preface **657** A focused issue on data mining and knowledge discovery in industrial engineering

Lian-Yin Zhai, Li-Pheng Khoo and **Sai-Cheong Fok** — **661** Feature extraction using rough set theory and genetic algorithms—an application for the simplification of product quality evaluation

Nong Ye and **Xiangyang Li** — **677** A scalable, incremental learning algorithm for classification problems

Peitsang Wu — **693** A fuzzy curved search algorithm for neural network learning

Xiaoming Huo — **703** Multiscale approximation methods (MAME) to locate embedded consecutive subsequences—its applications in statistical data mining and spatial statistics

Guoqing Chen, Qiang Wei, De Liu and **Geert Wets** — **721** Simple association rules (SAR) and the SAR-based rule discovery

Yi-Chung Hu, Ruey-Shun Chen and **Gwo-Hshiung Tzeng** — **735** Mining fuzzy association rules for classification problems

Tien-Lung Sun and **Wen-Lin Kuo** — **751** Visual exploration of production data using small multiples design with non-uniform color mapping

M. Kantardzic, B. Djulbegovic and **H. Hamdan** — **765** A data-mining approach to improving Polycythemia Vera diagnosis

T. B. Trafalis, M. B. Richman, A. White and **B. Santosa** — **775** Data mining techniques for improved WSR-88D rainfall estimation

I. Becerra-Fernandez, S. H. Zanakis and **S. Walczak** — **787** Knowledge discovery techniques for predicting country investment risk

Sung Ho Ha, Sung Min Bae and **Sang Chan Park** — **801** Customer's time-variant purchase behavior and corresponding marketing strategies: an online retailer's case

J. R. Brence and **D. E. Brown** — **821** Data mining corrosion from eddy current non-destructive tests

S. Morris, C. DeYong, Zheng Wu, S. Salman and **D. Yemenu** — **841** DIVA: a visualization system for exploring document databases for technology forecasting

I Volume Contents and Author Index for Volume 43
